

Building a full-fibre future
Full fibre offers far more reliable, consistent and faster connections - with speeds of up to one gigabit per second

Full-Fibre Gigabit Broadband Has Finally Arrived

What is Full-Fibre Broadband, and why is it important?

In the UK, the vast majority of “Superfast Fibre” broadband services actually depend on old copper telephone lines to deliver the service into businesses and homes.

With Superfast the “Fibre” goes no further than the cabinet in the street. This is also known in the industry as both “Part-Fibre” and sometimes even “Fake Fibre”.

Cambridge Fibre only supply Full-Fibre services. We never use copper (a.k.a. Superfast), and we only supply Ultrafast and Hyperfast services.

Cambridge Fibre Networks Ltd.
21 Signet Court
Cambridge CB5 8LA

Cambridge Fibre is now accepting orders in your area for our Full-Fibre broadband service.

Say goodbye to slow and unreliable "Superfast" services and say hello to a solid and reliable **Hyperfast** Internet Access Service.

Department for Digital, Culture, Media & Sport

**GIGABIT BROADBAND
VOUCHER SCHEME**

FREE INSTALLATION is available for the first 730 Cambridge residents that order a service. This is thanks to the support of the Gigabit Broadband Voucher Scheme.

www.cambridgefibre.uk/promotion

When is the service available and when should you order?

The network is expanding every day, and you are already situated near to our existing network. Your actual installation date is determined in consultation with you by our planners.

Even if you are still in-contract with your existing provider, the time to order is now. When ordering simply ask for an activation date that coincides with the end of your existing contract. Please speak to our friendly staff for more information.

The Gigabit Broadband Voucher Scheme has only allocated 730 vouchers for the whole of Cambridge. That's only enough vouchers for less than 1% of Cambridge Homes!

At the time of writing (March 4 2020) we are issuing about 60 vouchers per day and we expect to run out within a few days. The current Gigabit Voucher Scheme that serves Cambridge will be closed for new voucher applications in a matter of days. Act now to secure your free installation.

Our promises to you

- We will NOT dig-up your garden or drive
- We will NOT dig-up your street
- We will NOT interfere with or cancel your existing broadband service
- We will install your new fibre connection using existing ducts and/or telegraph poles
- We will consult with you to agree the best location to install your new modem and router

Unlike other service providers - we like to keep things simple

- We do not charge a line rental
- There are no hidden charges like cancellation fees at the end of your contract
- 12 Month and 24 Month contracts are available
- All prices are explained up-front and there will be no surprise price-hikes during your contract

ABOUT US

Cambridge fibre was founded in 2016 for the purpose of bringing a Next Generation Access (Full Fibre) network to Cambridge.

The company is the sister company of a Cambridge ISP that was established in 1998 called Netserver Ltd.

Cambridge Fibre have been quietly building an entirely new fibre network for the past 18 months, using the existing Netserver infrastructure as a foundation.

What do our customers think of the service?

“Having a gigabit broadband connection from Cambridge Fibre has been a true game changer. The reliable and fast speeds completely blow all of the competition out of the water allowing us to constantly backup our growing library of video footage, in real time, without bottlenecking the connection.”

Alex Stockley - Company Director of Lapse Film
